FEATURES

The Acerbis Airstrike-C helmet is the new top-of-the-line off-road helmet designed to be the benchmark in the category. It combines lightness, safety, comfort, advanced tech, and a full set of accessories.

This totally new, high-performance product is the result of extensive work by Acerbis's R&D team, testers, and riders.

The shell is made of carbon fiber and comes in two sizes, just like the inner EPS foam liners, and it's compatible with all modern neck braces. The design is sleek and aggressive, merging European and American styles in a unique way.

Every detail has been optimized for maximum performance and ease of use, both during races and training. For example, the air intakes are screwed onto the shell and can be removed for cleaning and maintenance.

The peak attaches to the shell without screws for easy handling and a clean, streamlined look.

The shell design is also made for perfect mask strap placement, with a thicker gasket around the area that helps improve grip. The front opening is designed to provide a wider field of vision and makes the helmet compatible with all large goggles.

In terms of safety, the helmet features a lightweight double-D ring chin strap made of red anodized aluminum.

The removable, hypoallergenic, breathable, and washable inner padding is made from soft-touch fabrics that are great at wicking moisture away.

The helmet also includes the new A.C.S. (Acerbis Comfort System), which uses elastics and small rubber suction cups for a better fit and ventilation on top of your head.

Ventilation is top-notch, with 4 air intakes and 6 exhaust vents. The cheek pads have a new attachment system for easier removal, plus silicone logos on the padding to help identify the release points.

The helmet also features a Quick Release System for quick removal in case of an emergency.

Acerbis delivers an impressive helmet not only in performance but also in features: the Airstrike-C comes with a camera mount, an extended peak for extra protection from the sun, water, and mud, and a spare screw kit.

At just 1150g ± 50g, this helmet is one of the lightest ECE 2206 certified helmets on the market.

Overall, the Acerbis Airstrike-C is perfect for off-road enthusiasts who want a helmet that's safe, comfortable, and packed with top-tier features.

Outer shell: Carbon fiber  
Approval: ECE 22-06  
Double outer shell and double inner shell  
Ventilation: 4 intakes-6 extractors  
Additional systems: A.C.S.  
Additional systems: QRS Emergency  
Double ring closure strap.  
Equipment: helmet bag + accessory/spare parts kit (support chamber - peak extension - tools - spare screws)  
Weight: 1150 +/-50 g

FEATURES

The X-FLEX ANAHEIM jersey is the result of continuous innovation and research. Conceived and developed together with the great motocross champions, the jersey reaches a new level of quality, capable of combining strength and comfort. Characterized by the use of stretch fabrics and ventilated mesh, it keeps the body always ventilated. The fitting studied and tested during numerous motocross competitions has led the jersey to adhere perfectly to all the shapes of the rider, guaranteeing any movement, thanks to its incredible elasticity. Taped collar and cuffs avoid seams in annoying places. Laser holes increase ventilation and show the quality and care with which the product was developed.

Use of stretch fabric and ventilated mesh with focus on ventilation, comfort and lightness  
Keeps the body dry  
Tight fitting to be used with or without protections  
Taped collar and wrists  
Laser-cut holes to increase ventilation  
Flat seams to reduce irritation  
Weight: 170g in size M

FEATURES

The X-FLEX 2.0 ANAHEIM pant is the result of continuous innovation and research. Conceived and developed together with the great motocross champions, the pant reaches a new level of quality, combining durability and comfort.

The use of stretch mesh fabrics and the presence of laser holes for ventilation keep the body ventilated at all times. The fitting studied and tested during numerous motocross competitions has led the pant to adhere perfectly to all rider shapes, guaranteeing any movement thanks to its incredible elasticity. The focus on details are highlighted by the use of taped fabrics on the inside, so as to avoid the use of the lining, waist adjustments with central custom closure and double adjustment at the hips. Always present is Cordura(R) fabric in the saddle contact area and double reinforcement using Ax Suede in the knees to ensure resistance even in high temperatures.

Use of innovative stretch and even more durable fabrics.  
Presence of mesh in the calf area to increase ventilation  
Use of lasered holes to Keep the rider's body dry  
Tight fitting for use with more or less bulky protectors  
Presence of internal taped fabrics to avoid the use of lining  
Flat seams to reduce irritation  
Use of Cordura (R) in the area ci contact with the saddle  
Use of double layer of synthetic leather AX Suede (TM) for resistance even at high temperatures

FEATURES

The Acerbis X-Leg Pro Vented Socks are specifically designed for off-road riders using knee guards or braces. These long, ventilated socks feature targeted compression zones to enhance circulation and reduce fatigue. A wide silicone elastic band ensures they stay securely in place, even with intense movement. Made from a blend of polyamide, polypropylene, and elastane, they offer excellent breathability and fast drying for all-day comfort. For optimal performance and comfort during races or training, pair your knee protection with these essential technical socks.

MATERIALS: polyamide, polypropylene, elastane  
REINFORCED AREAS: compression zones

GLOVES X-FLEX 2.0  
MUD  
0026688

0026688.090

FEATURES

Acerbis X-Flex 2.0 Mud is the essential off-road glove for any enduro or motocross rider. Developed through extensive testing with Acerbis athletes, it delivers maximum comfort, sensitivity, and ventilation—with exceptional grip, even in rain and mud. Featuring an aggressive pre-curved shape, mesh inserts, and ventilation holes, the glove stays cool and comfortable, even in hot conditions. The palm is made of highly durable AX Suede synthetic leather, enhanced with silicone details for extreme grip, while a gel insert on the thumb improves comfort when gripping the handlebars. It's also touchscreen compatible, so you can stay connected on the go.

Looking for the ultimate combination of grip and control? Try the Acerbis X-Flex 2.0 Mud—once you wear it, you won't want to ride without it.
