FEATURES

The Acerbis Airstrike-C helmet is the new top-of-the-line off-road helmet designed to be the benchmark in the category. It combines lightness, safety, comfort, advanced tech, and a full set of accessories.

This totally new, high-performance product is the result of extensive work by Acerbis's R&D team, testers, and riders.

The shell is made of carbon fiber and comes in two sizes, just like the inner EPS foam liners, and it's compatible with all modern neck braces. The design is sleek and aggressive, merging European and American styles in a unique way.

Every detail has been optimized for maximum performance and ease of use, both during races and training. For example, the air intakes are screwed onto the shell and can be removed for cleaning and maintenance.

The peak attaches to the shell without screws for easy handling and a clean, streamlined look.

The shell design is also made for perfect mask strap placement, with a thicker gasket around the area that helps improve grip. The front opening is designed to provide a wider field of vision and makes the helmet compatible with all large goggles.

In terms of safety, the helmet features a lightweight double-D ring chin strap made of red anodized aluminum.

The removable, hypoallergenic, breathable, and washable inner padding is made from soft-touch fabrics that are great at wicking moisture away.

The helmet also includes the new A.C.S. (Acerbis Comfort System), which uses elastics and small rubber suction cups for a better fit and ventilation on top of your head.

Ventilation is top-notch, with 4 air intakes and 6 exhaust vents. The cheek pads have a new attachment system for easier removal, plus silicone logos on the padding to help identify the release points.

The helmet also features a Quick Release System for quick removal in case of an emergency.

Acerbis delivers an impressive helmet not only in performance but also in features: the Airstrike-C comes with a camera mount, an extended peak for extra protection from the sun, water, and mud, and a spare screw kit.

At just 1150g ± 50g, this helmet is one of the lightest ECE 2206 certified helmets on the market.

Overall, the Acerbis Airstrike-C is perfect for off-road enthusiasts who want a helmet that's safe, comfortable, and packed with top-tier features.

Outer shell: Carbon fiber
Approval: ECE 22-06
Double outer shell and double inner shell
Ventilation: 4 intakes-6 extractors
Additional systems: A.C.S.
Additional systems: QRS Emergency
Double ring closure strap.
Equipment: helmet bag + accessory/spare parts kit (support chamber - peak extension - tools - spare screws)
Weight: 1150 +/-50 g

FEATURES

The T711 helmet inspired by an American style is the result of research and innovation, able to encapsulate the highest quality performance and safety. Helmet made of fiber with a double outer shell and a full shell that guarantee lightness and rigidity to the product. The visor with adjustable length, in the final part, the result of careful collaboration between the technical team and the riders, allowed to ensure less impact of mud on the mask during the race. The 18 air intakes in the helmet ensure excellent air flow so as to achieve excellent breathability. All this aided by the soft touch system that ensures high moisture evacuation. The provision of the hydration system allows the rider constant water consumption even during longer rides.

Outer shell: fiber glass.
ECE/ONU 22-06 HOMOLOGATION.
Double outer shell, double inner shell.
WEIGHT 1100g +- 50g in size "M".
18 air intakes
Double ring strap closure.
Shell compatible with Neck Brace.
Soft touch interior for effective humidity release.
Removable, hypo-allergenic and washable interior.
Peak with adjustable length and integrated magnet in the center to facilitate the positioning

FEATURES

Its American style, painstaking details and technical content make the new Whoops a benchmark. The outer shell, made of thermoplastic material, accommodates three inner shells and one outer shell. A helmet that will offer you super ventilation thanks to the five air intakes and five rear extractors. The lacing, with a double ring, is like that of our professional riders' helmets. Whoops is an off-road helmet, but it is also designed to accommodate modern 45 mm intercoms, compatible with neck braces, for maximum safety. The interior is fully removable and washable soft-touch with high moisture evacuation.

Their hypoallergenic and breathable fabrics are a guarantee of great comfort even in extreme conditions and torrid climates.
Outer shell: thermoplastic.
HOMOLOGATION: ECE/ONU 22-06.
One outer shell, two inner shells.
Ventilation: 5 inlets-5 extractors
Double ring closure strap.
