0026682.315

FEATURES

Acerbis Pants Mx Vented is the new pant for all off-road enthusiasts. It is a product that combines an extremely attractive look, with sublimated print, with an interesting technicality. MX Vented is a pant designed for hot climates that allows the rider to ride while remaining cool and dry thanks to the light and ventilated fabric with which it is constructed. Mobility is ensured by the many stretch inserts in the crotch area, above the knee, and in the calf area. The waist adjustment is threefold: two on the hips with Velcro and one micrometric at the front. To ensure excellent resistance in the most demanding offroad practices, Acerbis Pants Mx Vented has reinforced nylon zones in the knee area that can also wear modern braces thanks to the conformation of the trousers in that area.

Lightweight fabrics made with sublimation print graphics.
Elastic inserts in the calf area, front crotch and rear area for better mobility
Cordura® insert in the knee area
Regular fitting to follow the needs of different riders.

FEATURES

The X-FLEX 2.0 ANAHEIM pant is the result of continuous innovation and research. Conceived and developed together with the great motocross champions, the pant reaches a new level of quality, combining durability and comfort.

The use of stretch mesh fabrics and the presence of laser holes for ventilation keep the body ventilated at all times. The fitting studied and tested during numerous motocross competitions has led the pant to adhere perfectly to all rider shapes, guaranteeing any movement thanks to its incredible elasticity. The focus on details are highlighted by the use of taped fabrics on the inside, so as to avoid the use of the lining, waist adjustments with central custom closure and double adjustment at the hips. Always present is Cordura(R) fabric in the saddle contact area and double reinforcement using Ax Suede in the knees to ensure resistance even in high temperatures.

Use of innovative stretch and even more durable fabrics.
Presence of mesh in the calf area to increase ventilation
Use of lasered holes to Keep the rider's body dry
Tight fitting for use with more or less bulky protectors
Presence of internal taped fabrics to avoid the use of lining
Flat seams to reduce irritation
Use of Cordura (R) in the area ci contact with the saddle
Use of double layer of synthetic leather AX Suede (TM) for resistance even at high temperatures

Characterized by the use of stretch fabrics and ventilated mesh, it keeps the body always ventilated. The fitting studied and tested during numerous motocross competitions has led the jersey to adhere perfectly to all the shapes of the rider, guaranteeing any movement, thanks to its incredible elasticity. Taped collar and cuffs avoid seams in annoying places. Laser holes increase ventilation and show the quality and care with which the product was developed.

- Use of stretch fabric and ventilated mesh with focus on ventilation, comfort and lightness
- Keeps the body dry
- Tight fitting to be used with or without protections
- Taped collar and wrists
- Laser-cut holes to increase ventilation
- Flat seams to reduce irritation
- Weight: 170g in size M
